What's a Capcatcher Bottle Opener and how does it work?

A Capcatcher Bottle Opener is a handy gizmo that opens bottles (twistoffs too!) and catches the caps in the attached pouch.

We start with a nicely finished piece of select northern hardwood and add a heavily-plated solid cast iron opener head*. Then we put on a generous-sized pouch— either heavy vinyl or rich, oil-tanned leather— with a SnapFlap® on the bottom for easy emptying.

"Love it!!! Thanks for a great gift product!"

Leisa Giguere - Pleasanton, CA

"Time to share the best helper I own"

Erich Wenis - Danbury, CT

"THANKS, got them yesterday and they look great! Much better gift for these guys than a pair of cufflinks... thanks again for getting them here with time to spare."

Steve Yannerelli - New York, New York

The Capcatcher Bottle Opener is available in two basic styles.

The Screw-Mount fastens to cabinets, walls, doors, decks, bars, what have you, with 2 wood screws (included).

The Magnet-Mount uses an uncommonly powerful, high energy "Mega-Magnet". They really hold to the fridge when you pop a cold one! These are definitely not your mother's wimpy refrigerator magnets—these Mega Magnets keep your Capcatcher Bottle Opener close to "the source"! All Magnet Mount Capcatcher Bottle Openers are also pre-drilled so they can be screw-mounted too! The Magnet-Mount is the best gift choice—it can be used either on the fridge or the wall!

Both openers can also be mounted with the optional Double-Sided foam Mounting Pads (pressure sensitive).
